Skunk Spray Recipe

INGREDIENTS

Mix Together:

- 1 Quart of 3% Hydrogen Peroxide
- 1/4 Cup Baking Soda
- 1 teaspoon of Liquid Dish Soap

**Castile soap is a great natural option here*

DIRECTIONS

Wearing rubber gloves, drench the solution immediately after the spraying to all affected areas of the animal.

**NOTE: Almost always start with the inside of the mouth as this is often the first place to be hit by the spray.*

Rub the mixture in and scrub to neutralize the odor. Please NOTE, if you're washing your dog or cat, do not leave the mixture on longer than you have to as peroxide can bleach fur.

**Be cautious to not get the solution in the eyes.*

**Do not store this or make ahead as container could explode container.*
